1. Executive Summary

The client currently operates using an existing desktop-based jewellery management software. While it covers basic billing and inventory, several critical business operations are either missing or inefficient, leading to manual work, difficulty tracking transactions, and limited business visibility.

Cognieos proposes to develop a **modern cloud-enabled Jewellery ERP** that digitizes the entire jewellery business, including:

- Sales & POS Billing
- RFID Inventory Management
- Staff Management
- Customer CRM
- Advanced Girvi Management
- Sell on Approval
- Repair Management
- Accounting
- Analytics Dashboard
- Mobile Owner App

2. Existing Challenges

Current Issues	Proposed Solution
Basic Girvi records	Complete Self & Third-Party Girvi Management

Manual cash reconciliation	Cash, Bank, UPI & POS reconciliation
Traditional billing	Modern POS Billing

No RFID support	RFID Inventory Management
No Sell on Approval workflow	Complete Approval Tracking
No Mobile App	Android/iOS Owner App
Limited reports	Business Analytics Dashboard
No cloud access	Cloud-based ERP
Manual attendance	Staff Management
Limited customer engagement	CRM & WhatsApp Integration

3. Project Objectives

Develop a centralized cloud-based Jewellery ERP that:

- Reduces manual work
 - Eliminates stock discrepancies
 - Improves customer service
 - Tracks every jewellery item
 - Provides real-time business reports
 - Supports multiple branches
 - Increases operational efficiency
-
